Full service:

project

production

sale / rent

logistics

assembly

SELECTED MACHINES:

Welding robots - MAG welding

Lasers - cutting profiles, pipes and sheets

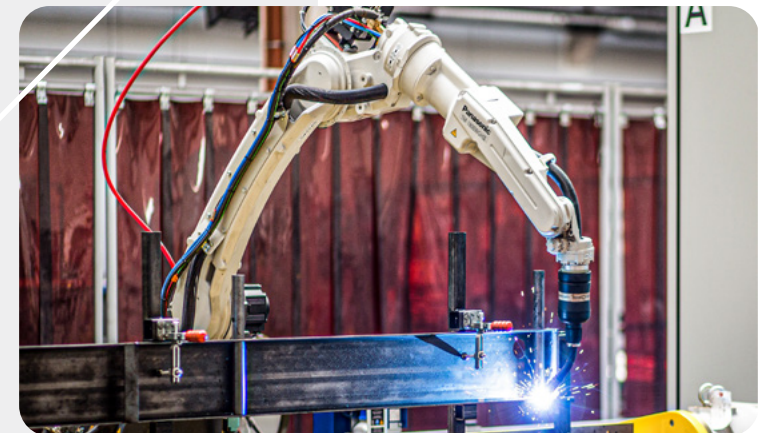

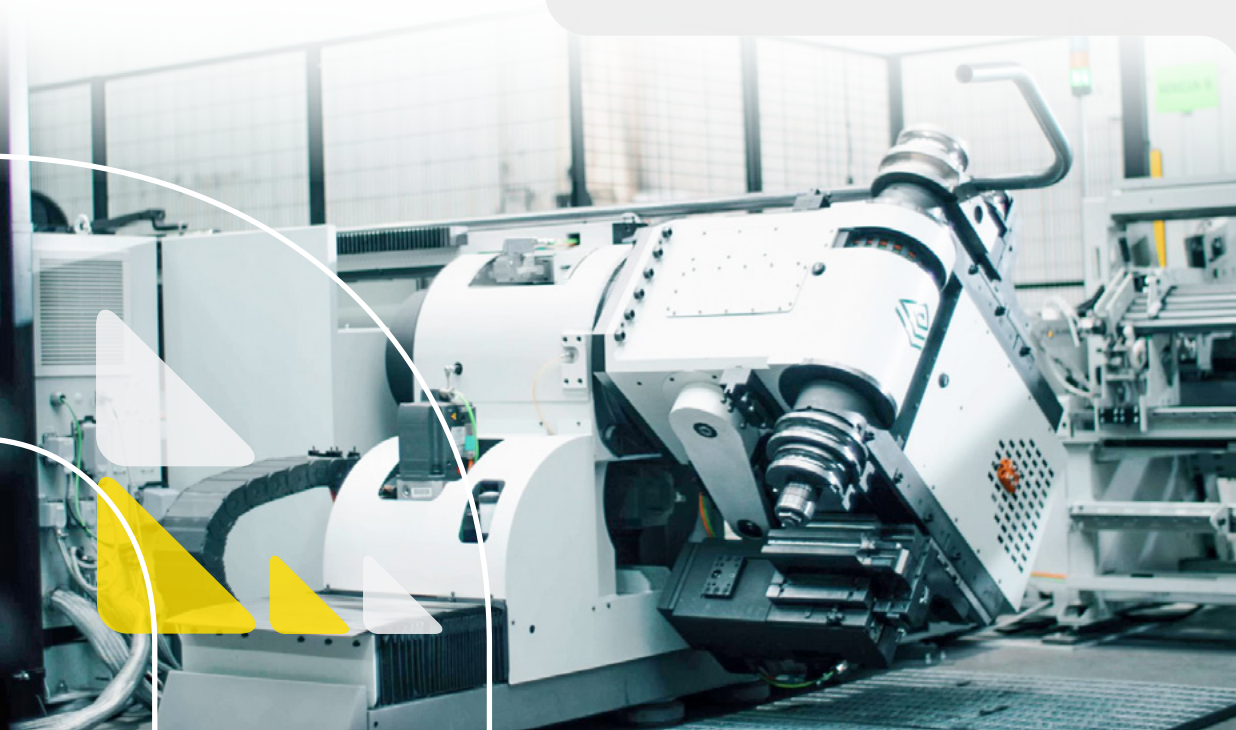

Technological lines for galvanizing
and for powder coating

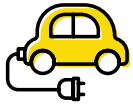

Plasma - sheets cutting

CNC pipe bender

CNC press brake

Automatic Multi-spot welder for openwork

replacement of 90%
of the car fleet by electric
and hybrid

power from
photovoltaic panels

automatic light
system, heat
pump system

electronic circulation
of invoices

gadgets and marketing
materials made
of recycled plastics

The above points are only a small percentage of all pro-ecological activities that have been successively implemented **since 2018**. They result in real benefits such as:

- **Competitive prices of manufactured products** - over 50% of the energy comes from the sun
- Reduced CO₂ emissions
- Reduced energy costs
- Minimized amounts of harmful waste
